sound to match your style

DEFUNC HOME

MULTIROOM WI-FI SPEAKER

Every detail of the HOME multiroom Wi-Fi speaker has been designed for smooth sound integration with the details of an authentic home environment. Created together with Swedish top audio engineer and acoustics expert Henrik Isaksson, the speaker's carefully calibrated components do all music genres and audio types justice.

- Sleek design that easily blends in
- Control up to 32 speakers
- Super-easy app to control speakers with
- Bass reflex
- EQ and placement-optimized EQ
- Custom fronts
- Floor stand with telescopic stick and cable winder
- Wall and corner mounts

From heavy beats to chatty podcasts to delicate strings, you'll be listening to your tracks just the way they were meant to be heard. Wherever you are in your home. However, you've chosen to decorate it.

- Tweeter: 0.75"
- Woofer: 6"
- Frequency range: 30-20.000 Hz
- Power supply: 144 VA (W)
- Recommended room size: 10-80 m²

HOME comes in two sizes. A grand living room is best equipped with several size **LARGE**. The kid's room might just need one **SMALL**. Mix and match around your home to find your optimal sound set-up.

HOME combines inner and outer engineering beauty. The speaker's elements give clean, crisp treble finely balanced with real bass. Its curved contour gives a spherical sound wave dispersion, letting you move around freely in a room without interfering with the audio. All in a compact, gracious shell.
